

User Guide IValueU Mobile App

November 2020

Version 1.02

Pavita Mohammed

Skipton Girls' High School – IvalueU Wellbeing Mobile App - USER GUIDE

1 Introduction

1.1 Scope and Purpose

The mobile app is titled 'IValueU' and it has been created for the pupils of Skipton Girls' High School. It is a wellbeing app that shows pupils indoor and outdoor physical and emotional activities they can do to improve and maintain their wellbeing. The activities are in the form of YouTube videos, made by pupils of Welsh primary schools. There is also a photo diary page where pupils can add a title, description and photo from their cameras or library and save them as diary entries. The more page shows pupils information about bibliotherapy and what organisations are involved in the app.

This user guide has been created to outline the flow of the app and explain how to navigate through the pages. Users should be aware that an internet connection is required to access the activity videos through YouTube. Users should also have access to their camera and photo library on their devices.

1.2 Process Overview

The app begins at the home screen where the user can tap the settings button. Here, they have the option to choose to register, change the theme or change the user language. The user can also choose the login button on the home screen and login with the password they set up on the registration page. The user chooses the indoor or outdoor tab. From there, the user chooses the physical or emotional menu and accesses the videos in that category. The user can choose the photo diary tab and click the plus button to add and save a new entry. The user can also choose the more tab at the bottom of the screen and click on either bibliotherapy or organisations.

Here is a typical sequence for using the software:

1. Open app
2. Click the Settings button from Home Page
3. Click Register and enter user details and click 'Register' button
4. Click Login from Home Page and enter password
5. Choose Indoor, Outdoor, Photo Diary or More tab.
6. Click through the Indoor and Outdoor tabs to get the Physical and Emotional YouTube video activities.
7. Click on the plus button to add and save new data to the Photo Diary.
8. Click on the Bibliotherapy or Organisations button to find out more information.

2 Login and Registration

The login and registration pages require the user to enter data. The Registration page can be found in the settings button on the homepage. The login button can also be found from the homepage. It should be noted, the user can access the login page from the registration page and vice versa. When the user registers, they enter a password, their first name, last name and DOB. The user then uses only the password they created to login.

2.1 Register and login to the app

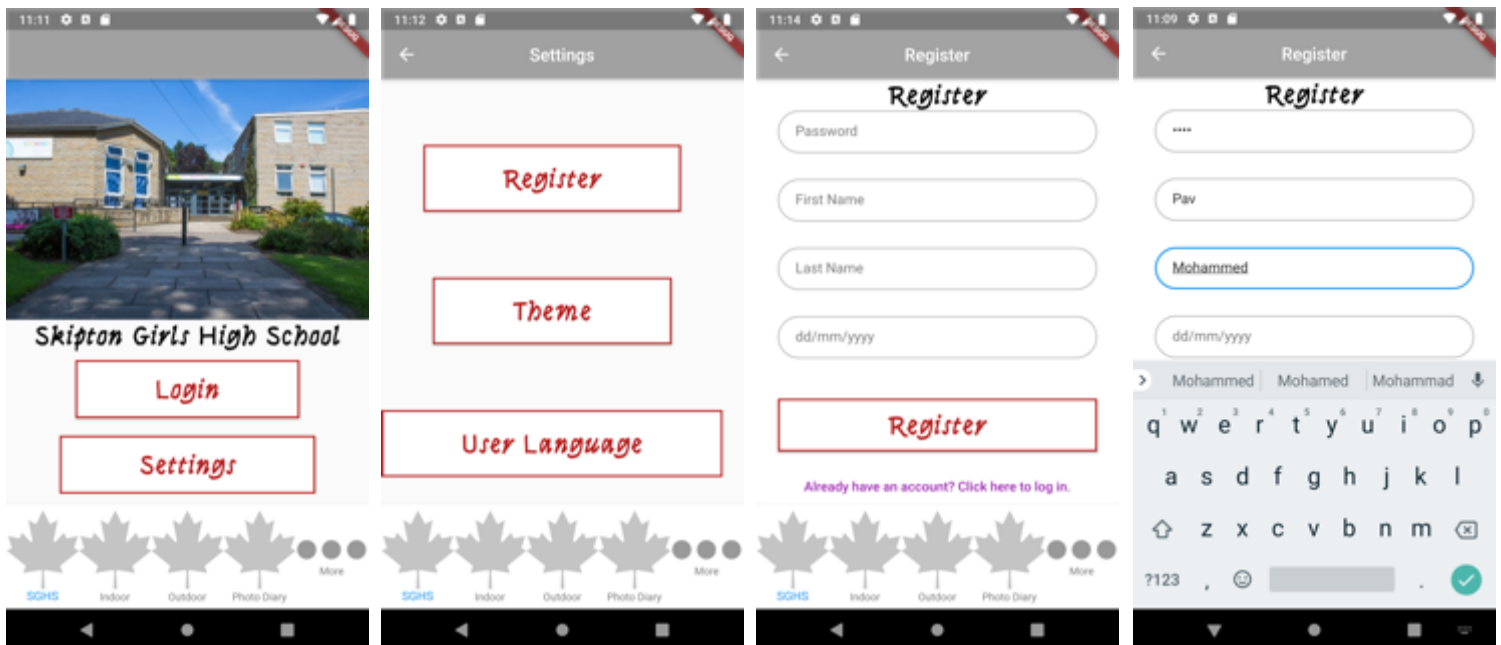

This workflow focuses on how to register to the app, going through the settings button.

2.1.1 Procedures to register

1. Click on the settings button on the home page.
2. Click on the register button on the settings page.
Option: If you have already registered, click on the 'Already have an account? Click here to log in.' text.
3. Click on a textbox to type in the details.
4. Type in the password to the password textbox.
5. Type in your first name to the first name textbox.
6. Type in your last name to the last name textbox.
7. Type in your DOB to the DOB textbox.

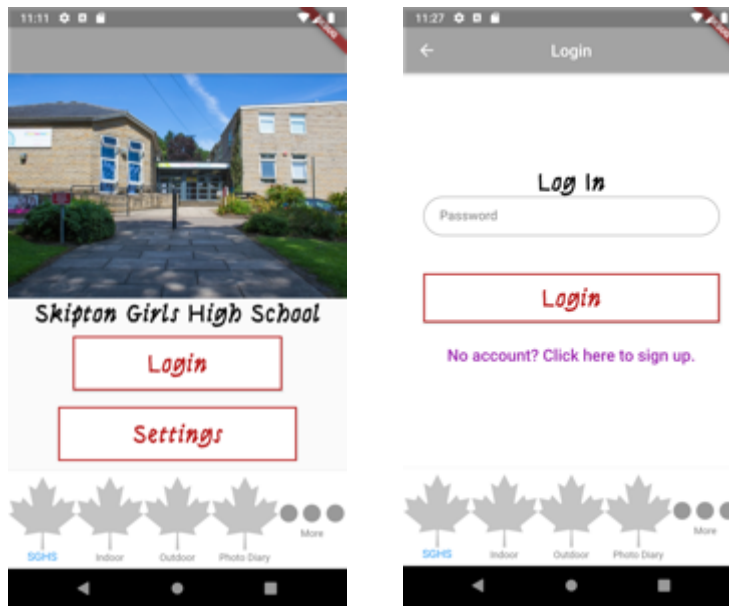

Note: Enter your DOB in the form dd/mm/yyyy.

8. Click on the 'Register' button.

2.1.2 Procedures for logging in:

1. Click on the Login button on the home page.
Option: If you have not yet registered, click on the 'No account? Click here to sign up.' text.
2. Click on a textbox to type in the details.
3. Type in the password to the password textbox.
4. Click on the 'Login' button.

The values entered into the textboxes must be a certain type of character.

Indicator	Definition
Password	The password textbox will not show in text format in order to maintain user security.
First Name	The first name value must be letters only.
Last Name	The last name value must be letters only.
DOB	The DOB value must be numbers only and must be entered in the format dd/mm/yyyy.

Figure 1.1: Values for Registration and Login form.

3 Indoor and Outdoor Activities

The Indoor and Outdoor tabs at the bottom of the screen will bring up the respective menus. The user will be given the choice of physical or emotional activities. If the user clicks the physical button, the physical menu will display with some text of how to use the resources. The user clicks on the “physical activities” button and is taken to the options for physical activities. They click on the activity they want to do and are shown a YouTube video.

3.1 Accessing Physical activities

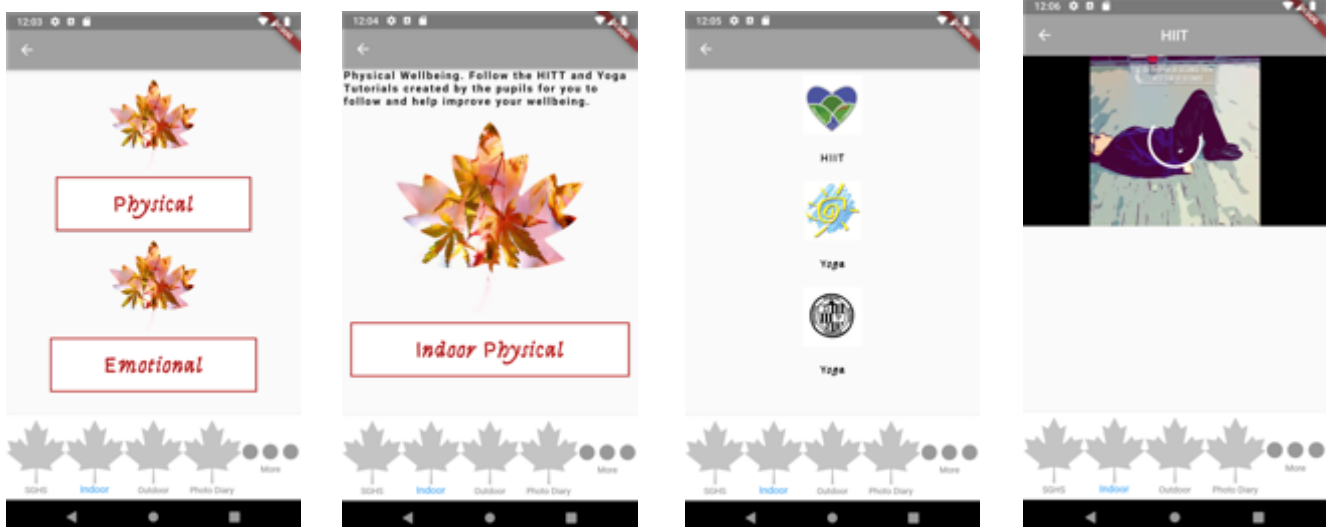

This workflow focuses on getting to access the physical activities in either the indoor or outdoor tab.

3.1.1 Procedure to access the indoor physical activities

1. Click on the indoor tab at the bottom of the screen.
2. Click on the “indoor activities” button or maple leaf.
3. Click on the “Physical” button or the maple leaf above it.
4. Click on the “Indoor Physical” button or maple leaf.
Option 1: Click on the HIIT icon and access the YouTube Video.
Option 2: Click on the first Yoga icon and access the YouTube Video.
Option 3: Click on the second Yoga icon and access the YouTube Video.

3.1.2 Procedure to access the outdoor physical activities

1. Click on the outdoor tab at the bottom of the screen.
2. Click on the “outdoor activities” button or maple leaf.
3. Click on the “Physical” button or the maple leaf above it.
4. Click on the “Outdoor Physical” button or maple leaf.
5. Click on the Yoga icon and access the YouTube Video.

3.2 Accessing Emotional activities

3.2.1 Procedure to access the indoor emotional activities

1. Click on the indoor tab at the bottom of the screen.
2. Click on the “indoor activities” button or maple leaf.
3. Click on the “Emotional” button or the maple leaf above it.
4. Click on the “Indoor Emotional” button or maple leaf.

Option 1: Click on the Meddwi iach trwy tapio m icon and see the four video options. Click on one to access the YouTube Video.

Option 2: Click on the Picking out the Positives icon and see the three video options. Click on one to access the YouTube Video.

Option 3: Click on the Blaencycwm Breathing Buddies icon and see the two video options. Click on one to access the YouTube Video

3.2.2 Procedure to access the outdoor emotional activities

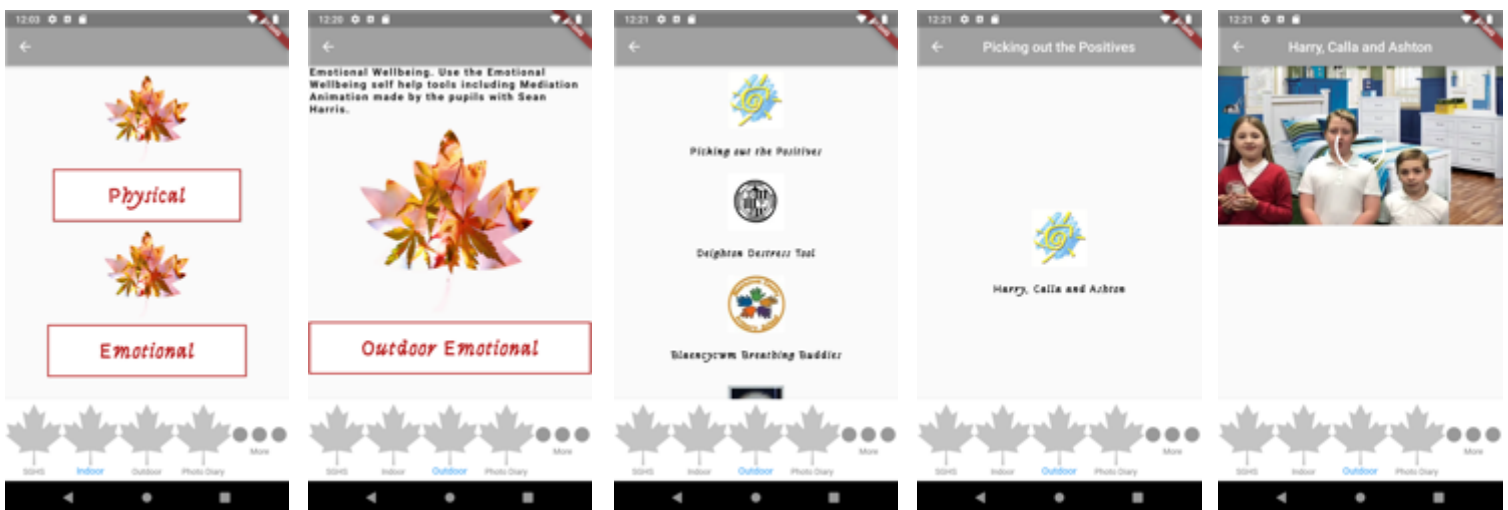

1. Click on the outdoor tab at the bottom of the screen.
2. Click on the “outdoor activities” button or maple leaf.
3. Click on the “Emotional” button or the maple leaf above it.
4. Click on the “Outdoor Emotional” button or maple leaf.

Option 1: Click on the Picking out the Positives icon and access the YouTube Video.

Option 2: Click on the Deighton Destress Tool icon and see the five video options. Click on one to access the YouTube Video.

Option 3: Click on the Blaencycwm Breathing Buddies icon and see the three video options. Click on one to access the YouTube Video.

Option 4: Click on the Meditation Animation icon and access the text about it and the YouTube Video.

4 Photo Diary

The Photo Diary tab at the bottom of the screen takes the user to a menu similar to the ones for the Indoor and Outdoor tabs. The user clicks the 'photo diary' button and is shown the list view of previously saved data entries. The user clicks on the plus icon on the right-hand corner of the screen and they are shown a page to add new data. Here, they can add a title, description and image from their camera or photo library to their entry. When they click the save button, their entry will be in the list.

4.1 Adding new data to the photo diary

This workflow demonstrates how to navigate through the photo diary and add new data.

4.1.1 Procedure to add new data using the camera

1. Click on the photo diary tab at the bottom of the screen.
2. Click on the "photo diary" button or the maple leaf.
3. Click on the plus button in the right-hand corner.
Option: Alternatively, you could click on a current entry in the list view to view it.
4. Click on a textbox to type in details.
5. Type in the title of the entry.
6. Type in the description of the entry.
7. Click on the camera button to take a photo.
8. Click the camera icon to take a photo.
9. Click the save button to save the entry to the list.

4.1.2 Procedure to add new data using the photo library

1. Click on the photo diary tab at the bottom of the screen.
2. Click on the "photo diary" button or the maple leaf.
3. Click on the plus button in the right-hand corner.
Option: Alternatively, you could click on a current entry in the list view to view it.
4. Click on a textbox to type in details.
5. Type in the title of the entry.
6. Type in the description of the entry.
7. Click on the library button to choose an existing photo.
8. Click the photo you would like to use.
9. Click the save button to save the entry to the list.

5 More Page

The More Page can be accessed by the tab at the bottom of the screen. It gives the user the option of accessing the Bibliotherapy page or the Organisations page.

5.1 Accessing the Bibliotherapy page

This workflow demonstrates how to access the bibliotherapy page from the more page.

5.1.1 Procedure to access the bibliotherapy page

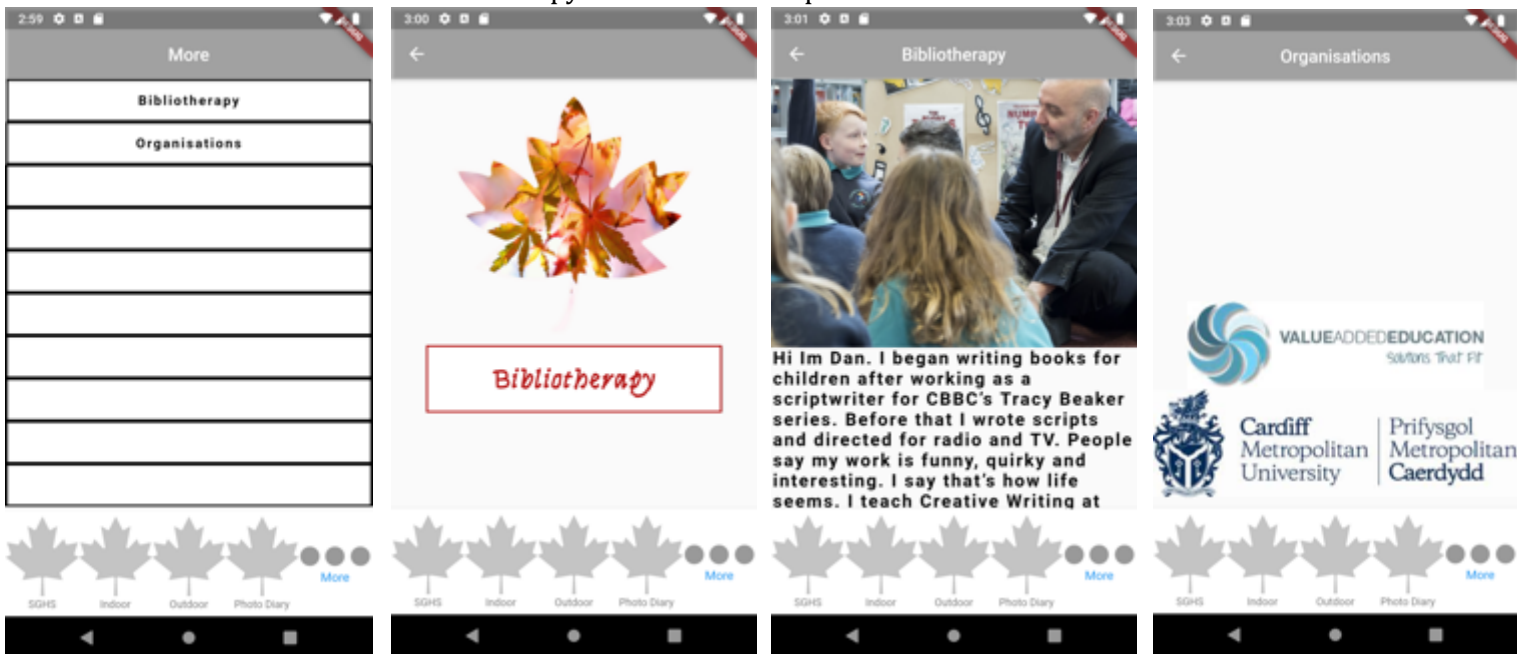

1. Click on the more tab at the bottom of the screen.
2. Click on the bibliotherapy button.
3. Click on the 'bibliotherapy' button or the maple leaf.
4. Scroll to read the text.

5.2 Accessing the Bibliotherapy page

This workflow demonstrates how to access the organisations page from the more page.

5.2.1 Procedure to access the organisations page

1. Click on the more tab at the bottom of the screen.
2. Click on the organisations button.
3. Click on the 'bibliotherapy' button or the maple leaf.

If you encounter issues not addressed by this user guide, please contact your account manager for additional support.

Code

Add New Data

```
import 'dart:html';
import 'dart:io';

import 'package:flutter/material.dart';
import 'package:image_picker/image_picker.dart';

class AddData extends StatefulWidget {
  static String tag = 'addData-page';
  @override
  _AddDataState createState() => _AddDataState();
}

class _AddDataState extends State<AddData> {

  var _titleController = new TextEditingController();
  var _descriptController = new TextEditingController();

  File _image;

  _imgFromCamera() async {
    File image = await ImagePicker.pickImage(
      source: ImageSource.camera, imageQuality: 50
    );

    setState(() {
      _image = image;
    });
  }

  _imgFromGallery() async {
    File image = await ImagePicker.pickImage(
      source: ImageSource.gallery, imageQuality: 50
    );

    setState(() {
      _image = image;
    });
  }

  @override
  Widget build(BuildContext context) {

    final titleText = Text(
      'Title:',
      style: TextStyle(
        fontSize: 25.0,
        fontWeight: FontWeight.bold,
        letterSpacing: 2.0,
        color: Colors.black,

```

```

    ),
  );

  final title = TextFormField(
    controller: _titleController,
    keyboardType: TextInputType.text,
    autofocus: false,
    obscureText: true,

            children: <Widget>[
              Image.asset('Assets/Dan_Anthony.jpg'),
              Text(
                'Hi Im Dan. I began writing books for children after working as
a scriptwriter for CBBC's Tracy Beaker series. Before that I wrote scripts and
directed for radio and TV. People say my work is funny, quirky and interesting.
I say that's how life seems. I teach Creative Writing at Cardiff Metropolitan
university and am a specialist in the field of intellectual property – there is
a funny, quirky and interesting aspect to it – does it help or hinder our
creative instincts? I run successful workshops for children and young adult
readers throughout the UK. I use my own stories as springboards into new
writing. People say that these transformative sessions switch students onto
reading and writing.',
                style: TextStyle(

                'Meditation Animation. Preserved in the muddy estuaries of
South-east wales are the footprints of cranes; large, raucous wetland birds who
made these trails around 7,000 years ago when the Bristol Channel was a
marshland connecting Wales to Somerset. Cranes became extinct in Wales around
five hundred years ago as a result of habitat loss (the wetlands were drained)
and hunting. In other words, as a result of human action. The cranes in this
short animation were animated in four primary schools – in celebration of the
return of the crane to Wales; a miracle enabled by a combination of science and
community action. This shows that when we choose to, we can and do make a
positive difference. The soundtrack features cranes and some other amazing
birds that haven't returned, amongst then the White Tailed Eagle, Dalmatian
pelican and Great Northern Diver. Also the bittern which, like the crane, came
back only more surreptitiously... Do we, as humans, have the sole right to decide
which species survive or disappear?',
